WORK & LEADERSHIP EXPERIENCE

FactsCorp, LLC Remote, NJ

Cloud Strategy Consultant

September 2024 – Current

• Ensures a global dev team follows best practices and advises on Google Cloud architecture technical strategy.

Kiselev Technologies LLC

NY, USA

Manager

October 2021 – Current

• Owner of Domestic Limited Liability Company to secure enhanced risk management protection, establish legal separation of personal and business assets, and provide flexible taxation options.

Salesforce Remote, NY

Senior Solution Engineer, MuleSoft

May 2022 – September 2023

- Co-authored the first automation workshop, facilitating in-person and virtual sessions for clients across AMER.
- Covering MuleSoft's largest and most complex clients within the CMT & CBS vertical.
- Architected an internal playbook for GCP security manager integration, enabling secure access to credentials outside Google's infrastructure before the release of the native connector.

CommerceHub Latham, NY

Software Engineer II

November 2021 – May 2022

- Developed a framework to configure and create dynamic shipment alerting rulesets; replaced hard-coded rules and the need for complete cloud redeployment. Lowering the development time of alerts by 80%.
- Spearheaded internal initiative to require future AWS service be deployed programmatically with CDK

MTX Group Inc Albany, NY

Senior Software Engineer

February 2021 – October 2021

- Served as the client-facing technical lead and HL7 SME, translating business needs into technical requirements for a global team, ensuring task accuracy, and receiving the "Delivery Excellence Award."
- Designed and implemented a government system for SMS and voice campaigns, facilitating urgent notifications
 to hundreds of thousands of American citizens. Citizen responses were streamed to Big Query, ensuring best-inclass performance, latency, and data freshness when delivering real-time performance metrics through Looker.
- Architected and developed an API service to imitate a human authenticating with Blackbaud's SKY API.
 Enabling scheduled programmatic SKY API integration that would otherwise require human intervention. Using Kubernetes to manage containerized applications and TF to streamline cloud infrastructure provisioning.

MTX Group Inc Albany, NY

Software Engineer – Machine Learning

September 2019 – February 2021

- Authored and implemented bespoke medical data middleware for interoperability with vaccination registries.
 Facilitated the national COVID-19 vaccine rollout. Initially, for the Arizona Department of Health, which President Joe Biden described as the "National Model." The only solution to support all deployment models, including locally on-device. Deployed to scale nationally by NYC, NYS, AZ, PA, and NV.
- Researched, designed, and implemented a methodology to calculate the distance to assets from non-stereoscopic images. Ensured deduplication of same-asset across multiple photos.

SKILLS/CERTIFICATIONS

- Technologies: Java, Python, TypeScript, JavaScript, HTML, CSS, C, OCaml, MuleSoft, Salesforce, AWS, GCP
- Certifications: GCP Professional Data Engineer, GCP Associate Cloud Engineer, Azure-900, Nerd
- Languages: Fluent in Russian and English

PROJECTS

github.com/danielkiselev

Whip – DandyHacks Hackathon Project

- Developed web scraper to acquire airline data, assessing airport traffic to predict ride-share surge pricing.
- Accredited for best use of GCP API (Google) and Frankenstein Award for best use of multiple APIs (FactSet).

Code Analysis – Advanced Compilers (Python)

• Developed a compiler to reduce C programs into 3-address code, identifying and removing redundant operations using a control flow graph and local value numbering. Improving execution time while lowering memory requirements of C code.

EDUCATION

University of Rochester Rochester, NY
